

# UPC Spray Foam Insulation

## Giving you the Keys to Better Homeownership

Homeowners know that without a reliable air and moisture barrier, their homes become vulnerable to water damage, air leaks, condensation, and mold.

Opting for UPC's open – and closed-cell spray foams, versus fiberglass, is a smart choice for homeowners. These foams outshine traditional insulation by delivering a single-component solution that acts as an effective air, moisture and vapor barrier. As they expand, they create a seamless, airtight building envelope, keeping your house free of mold, and making it a less noisy, more comfortable place to call home.

**Enjoy substantial monthly savings on your energy bills,  
benefiting both your wallet and the environment!**

### UPC SPRAY FOAM PRODUCTS:

- Deliver exceptional coverage and top-notch quality that effectively lowers heating and cooling expenses
- Form an effective air barrier, preventing leaks and minimizing energy loss
- Incorporate a vapor retarder to manage moisture levels
- Enhance indoor air quality by blocking dust and pollutants
- Minimize outside noise, fostering a more quiet living environment
- Reinforce walls, contributing to enhanced overall structural integrity
